

The **DFX3500** is designed to allow for easier service on differentials and gear boxes. The **DFX3500** will work in all types of weather, including cold temperatures. Its 3.5 GPM gear pumps make fast work of the thicker, heavier fluids associated with differential services.

**FEATURES:**

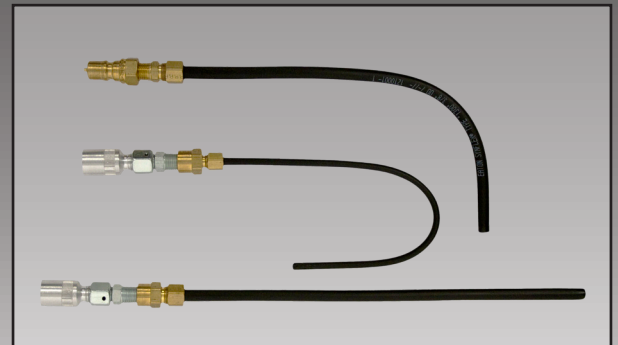

- 2 large 3.5 GPM gear pumps that work in all types of weather including cold temperatures
- 3 specially designed flexible and adjustable adapters to fit and hold in all differential openings
- Fingertip controlled pendant with 11 foot reach allows for easier, faster service
- Portable with small footprint
- 2 quart new and used fluid containers
- 20 foot 12 volt power cord allows for mobility of unit whether service is performed while vehicle is up on a lift or over a pit
- Storage shelf able to hold (2) 5 gallon buckets

**SPECIFICATIONS:**

- **Dimensions:** 41"H x 28"W x 23"D
- 2 quart new and used fluid tanks
- 20' 12 volt power cord
- 2 large 3.5GPM gear pumps
- **Weight:** 73 lbs

Fingertip Control Pendant

Flexible adapters fit and hold in all differential openings.
